Oduoma Joshua Ogorchukwu

Full-Stack Developer · Web & Mobile

Nigeria (Remote, UTC+1) · joshuaoduoma@gmail.com · +234 913 117 0107 · jaybobo.netlify.app · github.com/Joshking21

PROFILE

Full-stack developer who builds and ships production web and mobile apps with Next.js, React Native, TypeScript, Node.js and Supabase. Led the frontend of **PlayPick** (1,000+ users), co-founded **PypeLyne**, an AI social media platform live with 50+ users, and co-founded **Campus Drive**, a campus ride-hailing startup. I own products end to end, from interface and API to database and deployment. Open to remote roles and freelance projects.

EXPERIENCE

Software Developer (Contract) · Nexa Digital Ltd — Sep 2026 – Present

Co-Founder & Lead Developer · PypeLyne, built with Nexa Digital

- Co-founded **PypeLyne** and lead its technical development end to end: architecture, frontend, Supabase backend and AI features (see Projects). Also build web products for Nexa's clients.

Co-Founder & Lead Engineer · Campus Drive (FUTO Ride) — Jun 2026 – Present

- Co-founded a campus mobility startup and lead engineering on its first product, **FUTO Ride**, from the passenger and driver apps to the real-time backend (see Projects).

Frontend Engineer (Freelance) · BunchBay Technological Solutions, Lagos — Dec 2025 – Present

- Led frontend development and UI design of **PlayPick** for a BunchBay client, now used by **1,000+ users** (see Projects), integrating the client's REST APIs.

Frontend Developer Intern · BunchBay Technological Solutions — May 2025 – Dec 2025

Freelance Web Developer · Self-employed, Remote — 2024 – Sep 2025

- Built the admin dashboard for **iRent**, a platform that helps UNIBEN students find houses near campus and routes agents to them: users, payments and finance summaries (React, Vite). GitHub ↗

SELECTED PROJECTS

PypeLyne · 50+ users — Live ↗

AI social media manager I co-founded: write one post and it is formatted, scheduled and published to Facebook, Instagram, LinkedIn and X. Gemini suggests hashtags and posting times; Edge Functions run scheduled publishing.

React · Vite · TypeScript · Supabase · Google Gemini

PlayPick · 1,000+ users — Live ↗

Football prediction platform built for a client: fans predict live matches, join tournaments and custom competitions, and climb global leaderboards.

Next.js · Tailwind CSS · Framer Motion · REST APIs

FUTO Ride (Campus Drive) — GitHub ↗

Ride-hailing app for FUTO students: live campus map with sub-second driver updates over WebSockets, automatic ride matching, a driver app, Telegram arrival alerts and a one-tap SOS.

React Native · Expo · Node.js · WebSockets · Supabase

Seizure Prediction (Final-Year Project) — GitHub ↗

Dual-stream CNN-LSTM ensemble that predicts epileptic seizures from scalp EEG (CHB-MIT dataset). Filters 18-channel signals, extracts 360 wavelet features and serves predictions to a live dashboard.

Python · TensorFlow · scikit-learn · FastAPI · Next.js

Also built: Styleet, landing page & admin app (Next.js) Live ↗ · Lagos Foosball, real-time 3D multiplayer game for JFT Games (Three.js) Live ↗ · Hertz Renewables, solar company website (Next.js) Live ↗

SKILLS

Languages	TypeScript, JavaScript, Python, SQL, PHP, HTML, CSS
Frontend	React, Next.js, Tailwind CSS, Framer Motion, TanStack Query, Zustand, Three.js
Mobile	React Native, Expo
Backend & Data	Node.js, Express, FastAPI, REST APIs, WebSockets, Supabase (PostgreSQL, Auth, Edge Functions, Realtime), MongoDB, MySQL, Redis
AI / ML	TensorFlow / Keras, scikit-learn, Google Gemini API
Tools	Git, GitHub, Vercel, Netlify, Railway, Sentry

EDUCATION

B.Tech, Computer Science · Federal University of Technology Owerri (FUTO) — 2022 – 2026

CGPA 4.2 / 5.0, Second Class Upper (graduating December 2026). Final-year project: EEG-based seizure prediction with deep learning.
