Oduoma Joshua Ogorchukwu

Full-Stack Developer · Web & Mobile

Nigeria (Remote, UTC+1) · joshuaoduoma@gmail.com · +234 913 117 0107 · jaybobo.netlify.app · github.com/Joshking21

PROFILE

Full-stack developer who builds and ships production web and mobile apps with Next.js, React Native, TypeScript, Node.js and Supabase. Led the frontend of **PlayPick** (1,000+ users), co-founded **PypeLyne**, an AI social media platform live with 50+ users, and co-founded **Campus Drive**, a campus ride-hailing startup. I own products end to end, from interface and API to database and deployment. Open to remote roles and freelance projects.

EXPERIENCE

Software Developer (Contract) · Nexa Digital Ltd — Sep 2026 – Present

Co-Founder & Lead Developer · PypeLyne, built with Nexa Digital — pype-lyne.com

- Co-founded and lead technical development of **PypeLyne**, an AI social media manager: write one post and it is formatted, scheduled and published to Facebook, Instagram, LinkedIn and X. Live with **50+ users**.
- Built it on React, Vite, TypeScript and Supabase (PostgreSQL, Auth, Edge Functions for scheduled publishing and token refresh), with Google Gemini suggesting formatting, hashtags and posting times.

Co-Founder & Lead Engineer · Campus Drive (FUTO Ride) — Jun 2026 – Present

- Built **FUTO Ride**, a React Native ride-hailing app connecting students at the Federal University of Technology Owerri with campus kekes and shuttles, with separate passenger and driver apps.
- Delivered a live campus map with sub-second driver updates using a Node.js / Express WebSocket server and Supabase Realtime, plus automatic ride matching.
- Shipped Telegram arrival alerts, multi-seat booking and a one-tap SOS that alerts campus security.

Frontend Engineer (Freelance) · BunchBay Technological Solutions, Lagos — Dec 2025 – Present

- Led frontend development and UI design of **PlayPick**, a football prediction platform built for a client and now used by **1,000+ users**: live match predictions, tournaments, custom competitions and global leaderboards.
- Built it in Next.js, Tailwind CSS and Framer Motion, integrating the client's REST APIs for authentication, predictions and rankings.

Frontend Developer Intern · BunchBay Technological Solutions — May 2025 – Dec 2025

Freelance Web Developer · Self-employed, Remote — 2024 – May 2025

- Designed, built and deployed websites and web apps for individual clients and small businesses, handling everything from layout to launch.

SELECTED PROJECTS

Seizure Prediction (Final-Year Project) — GitHub ↗

Dual-stream CNN-LSTM ensemble that predicts epileptic seizures from scalp EEG (CHB-MIT dataset). Filters 18-channel signals, extracts 360 wavelet features, and serves predictions to a live dashboard.

Python · TensorFlow · scikit-learn · FastAPI · Next.js · Recharts

Styleet — Live ↗

Landing page and admin web app for a beauty-booking startup: stylist KYC, orders, payments, disputes, staff roles and reports.

Next.js · TypeScript · TanStack Query & Table · Zustand · Recharts · Sentry

Lagos Foosball — Live ↗

Real-time multiplayer 3D table-football game for JFT Games, as lead frontend developer: online matches, private rooms and a bot with three difficulty levels.

Three.js · TypeScript · Node.js · WebSockets · Redis

Hertz Renewables — Live ↗

Company website for a West African solar firm, with a solar system sizing calculator and enquiry forms that send leads to sales.

Next.js · TypeScript · Tailwind CSS · Vercel

SKILLS

Languages	TypeScript, JavaScript, Python, SQL, PHP, HTML, CSS
Frontend	React, Next.js, Tailwind CSS, Framer Motion, TanStack Query, Zustand, Three.js
Mobile	React Native, Expo
Backend & Data	Node.js, Express, FastAPI, REST APIs, WebSockets, Supabase (PostgreSQL, Auth, Edge Functions, Realtime), MongoDB, MySQL, Redis
AI / ML	TensorFlow / Keras, scikit-learn, Google Gemini API
Tools	Git, GitHub, Vercel, Netlify, Railway, Sentry

EDUCATION

B.Tech, Computer Science · Federal University of Technology Owerri (FUTO) — 2022 – 2026

CGPA 4.2 / 5.0, Second Class Upper (graduating December 2026). Final-year project: EEG-based seizure prediction with deep learning.
